

KUNSTASYLtours Station Gujrat / Mr. Amir

It's like a plane earth . It's not a big city. Most of the people are working in farming. In the other city are some big companies . One of the big companies is SERVICE. SERVICE is a shoes company. Like the europaen companies like puma and nike. So this company is very big in Pakistan and the companies name is SERVICE. The other big company is PAK FAN, making fans. Because this time in July the weather is very hot weather in Pakistan, so mostly people use fans. The company supplies the whole Pakistan with fans. I'm sure the PAK FAN is too much exporting too UE and United Emirates. At PAK FAN there are just working the men and in the other company some women are working, men and women, in SERVICE.

My family is working in farming. I have two brothers and two sisters. We had a small house. It's not big. Four rooms. The farm is not big, a small family farm. When I was in Pakistan we were working together. Me, my brother and my father. The sisters are married. They live in other states. My big brother has 3 children and the other one 4 children. My mother died one year ago. I am here now. At this time my two brothers, the children and my father live in this house. After I married I was no more living in the farm. I'm five years married. After the marriage there were some social problems and we went to Islamabad. I was working there with a friend. He is making some plates and cups and all the things you use in kitchen. I made the cups like tea and coffee. And I made some design in the cups. We had a small apartment. One room and a kitchen and washroom. Islamabad is a very big city, but I can't explain you ,I think. Berlin is big - but compared with Islamabad, Berlin is like a small city. I was working there for one year and three or four months. Then my friend lived in Lybia and I got a visa for Lybia. After six months I went to Lybia. My friend helped me and i was working in a juice factory and sometimes on saturday and sunday i was working in the paints work. Not every weekend, but sometimes. The money in juice factory was not too much. I went to Lybia for the working, because i was not happy for my job in Islamabad. For this company I had to work too much and the salary was very low. Everything in Pakistan is very high costs. For the flatrent, for the food and anything, and the electricity bills are very high. In Lybia I lived in Tripoli. I went there in 2012 in February or March. In 2012 it was ok in Tripolis but after that the conditions were not good. The money was good, but with the civil war it was not good. With jobs it is very easy because there are too much jobs in Lybia. But after the civil war it was very dangerous, because on the streets – somebody could come snitching the mobiles, the money and everything like rings, the goldrings, anything. I come in 2014 to europe. In december. I stood three years in Lybia. In Lybia, it was not acceptable because it was too much dangerous in the streets. And the other was the civil war... you

could not call the police if somebody was coming into your company to fight the company. There was no control in the police, because it was too much corruption.

I came by boat from Lybia. It was a big boat. It was a boat with 200 people but they put too much people in it. 50 people more. They were 250 people in the boat. We started our journey in the night. I think we were 24 hours in the sea. It was too much. To Germany I came by car.

I was coming to Munich then I got the bus.

I asked a German lady to help me to find the bus and to find the tickets.

I feel too much comfortable in Europe compared with Lybia and Pakistan. I like very much farming. I told the jobcenter. They told me to do first the Deutschkurs and after they will help me with the farming and other things. But first I have to go to school and learn German. It's so important.
